IN-CAR HOLDER "TOP MATT BLACK" WITH CUP SUCTION GEL SYSTEM

Description

IN-CAR HOLDER WITH CUP SUCTION "GEL SYSTEM"

QUICK RELEASE

The opening of the jaws of this holder is provided a back button which allow you to enlarge easily and with one sole hand the jaws, so favoring comfort and safety in the insert and removal of the device to the holder while driving.

CUP SUCTION GEL SYSTEM

In comparison to the usual rubber suckers, this kind of suction-cup made of superior gel quality offers a greater grip ability. The softness with which it is built, the special material and the high gripping power, without any additional accessory, offer the possibility to put the holder on any flat surface and not only on the windshield. In the occasion of loss of grip power due to the continued use, you can simply wash the cup under running water as to recuperate the original grip-power features.
